FOR IMMEDIATE RELEASE

Eclipse Corporation's DocWizard Achieve Oracle Validated Integration with Oracle's JD Edwards EnterpriseOne

DocWizard Automated Form, Document and Label Design and Generation

Cape Coral, Florida – December 7, 2016 – Eclipse Corporation, a Gold level member of Oracle PartnerNetwork (OPN), today announced that it has achieved Oracle Validated Integration of DocWizard 3.2 with Oracle's JD Edwards EnterpriseOne 9.2. DocWizard provides rapid form, document and label design software and high performance document generation software to meet the needs of high volume and complex applications. Clients with legacy form software can easily convert their templates in seconds with DocWizard and quickly add advanced presentation features like 3D Charting, 2D barcodes, and data-driven advertising and or safety messaging.

To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. With this integration DocWizard enables customers to open JD Edwards EnterpriseOne document and form templates automatically and import all labels, fields and images into the DocWizard Designer. Tables can be easily set up and with the click of a mouse, users can set up overflow rules to take advantage of Intelligent Document Reduction (IDR) features. IDR can save 33-66 percent of the pages required to present the same information traditionally presented in static packing slip, invoices, statements, etc.

"The Eclipse team has been engaged with Oracle's JD Edwards EnterpriseOne users for over 15 years," said Steve Luke, CEO of Eclipse. "When we discovered many of our Oracle's JD Edwards EnterpriseOne customers were struggling with aging legacy form and label software solutions, we knew it was time to create a tighter integration of our software with Oracle's JD Edwards EnterpriseOne. DocWizard is the result of close collaboration with our joint customer, McKesson Medical-Surgical. We are proud to have completed this validation with Oracle."

"Achieving Oracle Validated Integration gives our customers confidence that the integration between DocWizard and Oracle's JD Edwards EnterpriseOne is functionally sound and performs as tested," said David Hicks, Vice President, Worldwide ISV, OEM and Java Business Development, Oracle. "For solutions deployed on-premises, in the cloud, or both, Oracle Validated Integration applies a rigorous technical review and test process that helps to reduce deployment risk and improves the user experience of the partner's integrated offering."

Eclipse enterprise forms software is used by some of the most prestigious companies in the world, including AT&T, Eaton, GE Healthcare, McKesson Medical-Surgical, Pella Corporation, and WORLDPAC, among others.

About Eclipse

Eclipse Corporation is a leading provider of enterprise document design, presentation, generation, automation and customer communication management software. Eclipse and our

authorized partners work closely with clients to provide tailored solutions that conform to specific needs at a fair price. Eclipse's principles are simple: provide the right solution and get the job done - on time. Our depth of knowledge and experience allows Eclipse to deliver on these principles every time. Watch this video to learn more about what we do and who we do it for.

About Oracle Validated Integration

Oracle Validated Integration, available through the Oracle PartnerNetwork (OPN), gives customers confidence that the integration of a complementary partner software product with an Oracle "on-premises" Application has been validated and the products work together as designed. This can help customers reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review partner integrations and partners who successfully complete the program are authorized to use the "Oracle Validated Integration" logo. For more information, please visit Oracle.com.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) is Oracle's partner program that provides partners with a differentiated advantage to develop, sell and implement Oracle solutions. OPN offers resources to train and support specialized knowledge of Oracle's products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to be recognized and rewarded for their investment in Oracle Cloud. Partners engaging with Oracle will be able to differentiate their Oracle Cloud expertise and success with customers through the OPN Cloud program – an innovative program that complements existing OPN program levels with tiers of recognition and progressive benefits for partners working with Oracle Cloud.
