Eclipse Performance Test

Document Software Performance & File Size - Eclipse Vs Leading Competitor

Enterprise Document Comparison for Performance and Files Sizes Produced

Adobe AEM Document Speed Test

Batch Size Number of Documents	90	499	649
Batch Time Total	19	102	132
Seconds Per Document	0.211	0.206	0.203

Total Test Time 0:15:19 Average Per Document Time = 0.205

Eclipse DocOrigin Document Speed Test

Batch Size Number of Documents	90	499	649
Batch Time Total	6	29	38
Seconds Per Document	0.067	0.058	0.059

Total Test Time 0:05:25 Average Per Document Time = 0.062

DocOrigin Average Performance is Faster by 331%

Competitors Time Minutes	DocOrigin Time Minutes		
00:15:19	00:15:19	288.09%	FASTER

Test Criteria

Performance test was completed by a third-party document generation solution provider.
All performance test were run on the same server. No other processes were running at the time of each test.
Both software products consumed the same XML data for each test for merging with their Native Template File.
The Adobe templates were designed using Adobe AEM.
The Competitors document templates were imported into DocOrigin Design with minor clean up

Green represents Faster Performance or Smaller Files Size
Red Represents Slower Performance or Larger File Size
Date Updated: 07/31/2020

	Competitor	DocOrigin	Performance %
Speed Test 1
